

High-contrast, game-sensing lenses designed to help you discover hidden wildlife.

PREDATOR

12x50 PREDATOR

The 12x50 is the perfect choice for long range viewing under all light conditions in open country. With its wide field of view, 29 ounce weight and 15 mm eye relief the new 12x50 Predator is easy and comfortable to use for hours at a time. Included with both models is a very user-friendly deluxe custom molded case that will protect your binoculars for years to come.

Item no. 268	12x50 Predator	MSRP \$899
Weight: 29 oz	Eye Relief: 15 mm	
Field of view: 210 ft @ 1000 yds	30 year warranty	

For those who refuse to sacrifice portability for added power and brightness, Steiner now offers the new 10x50 and 12x50 Predator binoculars. These new center-focus models offer exceptionally bright close-up views with their large 50mm lenses, yet feature a lightweight design that is compact enough to take anywhere.

Excellent for glassing at long ranges in open countryside, both binoculars feature a smooth and accurate center-focus wheel that can be turned effortlessly and efficiently, allowing users to quickly focus in on objects or track moving subjects from a distance. The 10x50 and 12x50 focus from close range to infinite distance in less than one full rotation of the focus wheel.

The exceptionally bright, phase-corrected binoculars are equipped with Steiner's High-Contrast "CAT" lens coating system that helps make wildlife detection much easier for the human eye. By filtering out background greenery and foliage and enhancing the visibility of browns, reds and other wildlife colors, the coating helps users detect distant images even against well-camouflaged backgrounds. When scanning a wooded area with the Steiner Predator animals seem to "pop out" against scenery.

10x50 PREDATOR

With its 5 mm exit pupil and fully-multi coated lenses the 10x50 Predators provide excellent light transmission, high power and a generous field of view. These Predators are fully multi-coated with Steiner's high contrast CAT Predator coating and are phase corrected for distortion free images. Weighing in at only 28.5 ounces the 10x50 Predator is easy to carry all day with its extra wide non-slip neoprene carry strap.

Item no. 266	10x50 Predator	MSRP \$849
Weight: 28.5 oz	Eye Relief: 15 mm	
Field of view: 261 ft @ 1000 yds	30 year warranty
